
MULTIFLOW (SPRAY)

DESCRIPTION:

A multi-purpose, anti-corrosive and unblocking high-fluidity lubricant in spray format, for use in a countless number of industrial and domestic applications.

PROPERTIES & ADVANTAGES:

- ✓ Excellent fluidity, facilitating penetrability even in narrow passages.
- ✓ Its spray format facilitates use in areas which are hard to reach.
- ✓ Excellent anti-corrosion, anti-oxidant and anti-rust power.
- ✓ Compatible with all types of rubber, elastomers and paint.
- ✓ Displaces moisture, drying electrical systems quickly.

APPLICATIONS:

- ✓ Degreasing of bicycle and motorcycle chains.
- ✓ Powerful unblocker of parts seized by rust.
- ✓ An efficient anti-corrosive agent and protector of parts machined with soluble / emulsifiable oils (cutting fluid).
- ✓ Protector of moulds in the plastic and prefabricated concrete industries
- ✓ Gets rid of squeaks and annoying noises in hinges, bearings, locks, sewing machines, ...
- ✓ Prevents corrosion in elements exposed to environmental moisture.
- ✓ Protection of machinery, armory, sporting material, gardening material, ...
- ✓ Displaces moisture in electrical contacts, enabling vehicles with a wet distributor to start.

TIPS / PRECAUTIONS:

A pressurized spray product. We recommend complying with the handling tips provided on the product label and / or safety data sheet. .

PACKAGING:

A 520 cc spray in 12-unit boxes.
