

## MASTERCLEAN HAND

### DESCRIPTION:

Hand wash gel with new concentrated formula. Its composition involves perfectly balanced surfactants with high penetrating power capable of achieving an extraordinary cleansing - degreasing action and an effective elimination of dirt, without causing irritation or dryness on the skin.

High cleansing power combined with a set of components of great softening and re-greasing capacity, providing a better dermatological behaviour of the product, providing a final touch of great softness.

Biodegradable product free of petroleum based solvents and aggressive chemicals.

### TECHNICAL INFO:

PHYSICOCHEMICAL CHARACTERISTICS	VALUE
Aspect (20°C)	Orange Viscous Liquid
Density (20°C)	0.98 - 1.03
pH	7 - 8.5

### INSTRUCTIONS FOR USE:

For a perfect performance, we recommend to pour a small amount of concentrated gel on the hands and rub against each other, distributing the gel homogeneously in order to achieve an effective penetration of the soap and a good elimination of the dirt; once this purpose is achieved, rinse abundantly with water.

Due to its balanced composition, it can be used in many different fields and activities within the professional sector: workshops, factories, industry, garages, printers, worksites...

Thanks to its concentrated formula, it can be diluted according to the dirt to be removed, from 1 to 3 parts of water, maintaining the product's viscosity and the cleaning capacity even with high hardness waters.

### ADVICE/PRECAUTION:

In case of contact with eyes, rinse immediately with plenty of water and seek medical help.  
It is recommended to follow the handling advice indicated in the product label and/or in the safety sheet.

### PACKAGING:

10L Bottles
