

MASTERCLEAN MOTOR BBO

DESCRIPTION:

Aqueous liquid **CONCENTRATE** product with high detergent-degreaser power. Formulated using **BIODEGRADABLE** components, environmentally friendly. Free of solvents and hydrocarbons of a petroleum nature.

APPLICATIONS:

- ✓ Cleaning and degreasing of vehicle bodies, truck tarpaulin, etc.
- ✓ Cleaning and degreasing of metal parts.
- ✓ Cleaning and degreasing of engines and industrial machinery.

PROPERTIES & ADVANTAGES:

- ✓ Formulated with alkaline pH, quickly removes traces of grease and contamination adhering to surfaces without damaging crystals, enamels or paints.
- ✓ Easily removes dirt, incrustations, insects, bird droppings, etc. Excellent fluidity, facilitating its penetration even in narrow passages.
- ✓ Its **BIODEGRADABLE** formulation, environmentally friendly, allows it to be used outdoors in sensitive areas, which is essential for degreasing agricultural machinery, heavy equipment, tunnels, wind generators or solar panels, where its performance significantly increases after cleaning their photovoltaic surfaces.

TECHNICAL DATA:

PHYSICOCHEMICAL CHARACTERISTICS	VALUE
Aspect (20°C)	Transparent Yellowish Liquid
Density (20°C)	1.00 – 1.03
pH	10 – 11.5

HOW TO USE:

Apply with high pressure systems, manual or electric sprayers.

The recommended dose according to the application:

- ✓ Cleaning by steam device: adjust dose on nozzle, 0,5%-1%
- ✓ Manual cleaning of engines: 10-20% in water.
- ✓ Surfaces very dirty or with high quantity of grease / dust: 20%-30%
- ✓ For extremely dirty applications the product can be used directly without performing dilution.

Once the washing, it is recommended to rinse and dry in the shade.

ADVICE / PRECAUTIONS:

Alkaline product, it is recommended to use gloves and goggles to work with high product concentration.

It is recommended that the handling advice displayed on the label of the product and/or on the safety sheet is followed.

PACKAGING:

20L jerrycan.
